JAVASCRIPT

WHAT IS JAVASCRIPT?

JavaScript is used to program the behavior of your website.
If your website is a person, JavaScript is what makes you jump and dance.

What is HTML?

What is CSS?

What does <img></img> do?

What does the <iframe></iframe> tag do?

What is something you learned
during the internet safety lesson?

<form></form>

Your form goes in these tags!

```
<input type="button" value="SUBMIT" onclick="WelcomeMe()" />
```

```
function WelcomeMe() {
  var Color = document.getElementById('MyColor').value;
  document.body.style.backgroundColor = Color;
}
```

SHEro of the Month

HALL OF HEROES

(unveiling, group-reading,
scavenger hunt)

JAVASCRIPT

```html
<form>
        <input type="text" id="MyColor" placeholder="My favorite color is..." />
        <input type="text" id="MyName" placeholder="My name is..." />
        <input type="text" id="MyAnimal" placeholder="The best animal is..." />
        <input type="button" value="SUBMIT" onclick="WelcomeMe()" />
    </form>
    <p id="welcome">I am waiting for you, new friend!</p>
```

```
function WelcomeMe() {
        var Color = document.getElementById('MyColor').value;
        document.body.style.backgroundColor = Color;
        var Name = document.getElementById('MyName').value;
        var Animal = document.getElementById('MyAnimal').value;
        document.getElementById('welcome').innerHTML = "Welcome, " + Name + "! I like " + Animal + " too!";
}
```

WHAT ARE YOU THANKFUL FOR?
